## SUMMARY

---

Motivated Full Stack Developer and B.Voc Internet of Things (IoT) student with hands-on experience in building responsive web applications using React.js, JavaScript, Tailwind CSS, Node.js, Flask, PostgreSQL, and REST APIs. Experienced in developing user interfaces, dashboards, and database-driven applications through academic projects and internship experience. Familiar with Git, GitHub, IoT, and Arduino, with strong problem-solving skills and a passion for learning new technologies.

## EDUCATION

---

### **Bachelor of Vocation (B.Voc) – Internet of Things (IoT)**

Dayalbagh Educational Institute (DEI), Agra

2024 – 2027 (Expected)

Relevant Coursework: Internet of Things, Web Development, Database Management, Software Development, Embedded Systems, and Networking Fundamentals.

## EXPERIENCE

---

### *Software Development Intern*

*One Place Solar Pvt. Ltd., Agra | May 2026 – June 2026*

- Worked on the ReyHub Equipment Management System.
- Developed responsive UI components using React.js and Tailwind CSS.
- Contributed to Dashboard, Sidebar, Modules, and Equipment Management features.
- Worked with REST APIs and dynamic data integration.
- Used Git & GitHub for version control and team collaboration.

### *Frontend Web Development Intern*

*Skill Orbit India | May 2026 – July 2026*

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Built practical projects including a Weather App, To-Do List, and E-Commerce Website.
- Worked on UI/UX-based projects and technical assignments.
- Improved frontend development, and problem-solving skills.

## PROJECTS

---

### *Rey Hub – Equipment Management System*

**Tech Stack:** React.js, Tailwind CSS, Flask, PostgreSQL

- Developed an equipment management platform for managing solar equipment and related data.
- Worked on **Dashboard, Sidebar, Modules, and equipment management** features.
- Built reusable UI components and integrated APIs for dynamic data handling.

### ***Smart Garbage Monitoring System – IoT***

**Tech Stack:** IoT, Sensors, ESP8266/Arduino, Web Dashboard

- Developed an IoT-based system to monitor the garbage level in waste bins.
- Used sensors for real-time bin-level monitoring and status updates.
- Designed to improve waste collection efficiency and reduce unnecessary manual checking.

### ***College Event Management System***

**Tech Stack:** HTML, CSS, JavaScript, React.js

- Developed a web-based platform for managing college events and student participation.
- Implemented features for viewing event details, registrations, and event management.
- Created a responsive and user-friendly interface for students and organizers.

### ***AI-Powered Warehouse Management System — Ongoing***

**Tech Stack:** React.js, Tailwind CSS, Node.js/Flask, PostgreSQL, AI

- Currently developing a smart warehouse management system for inventory, suppliers, orders, and stock movement.
- Implementing Barcode/QR Code tracking, analytics dashboard, and real-time inventory management.
- Planning AI-based demand forecasting and inventory analytics to support better stock-management decisions.

## **TECHNICAL SKILLS**

---

**Frontend:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS

**Backend:** Basic Node.js, Flask, REST APIs

**Database:** PostgreSQL, MySQL

**Programming:** JavaScript, Python

**IoT:** Arduino, ESP8266, Sensors .

**Tools:** Git, GitHub, VS Code, , Arduino IDE

**Other:** Responsive Web Design, API Integration, CRUD Operations, UI Development

## **CERTIFICATIONS**

---

**One Place Solar** - Software Development Intern - [Certificate Link](#)

**Skill Orbit India** - Frontend Web development Intern - [Certificate Link](#)
